

OUP Bibliography: Phonology Draft Reference List

This document includes an unannotated list of the references I had in the draft version of this entry. There were a number of restrictions on the bibliographic entry:

- a maximum of 8 references per section and 150 references in the entire entry
- Section introductions could be maximally one paragraph long
- Work that was forthcoming or in press could not be cited

Consequently, there were a number of things that I wanted to cite but could not. I have included these excised works below.
